BMW Motorcycle Covers

BMW is proud to present its full line of exclusively designed and custom fitted motorcycle covers. These covers are made of lightweight and durable 150 Denier Dacron Polyester with a urethane coating to afford maximum wet weather protection and they also have venting panels so that moisture is not trapped beneath the cover. For the rider's convenience, full-aluminized panels are sewn in on both sides and the rear of these covers so that the motorcycle can be covered immediately after riding without having to worry about hot engines or exhaust pipes causing damage.

We are also including other practical features such as an elastic shock cord sewn in the entire bottom of each cover for a secure fit. And on the LT, RT, RS, and K75 versions, flannel panels are provided to protect the windshield from unsightly scratches.

All of these features add up to a high quality product plus each cover folds up to a very compact size for easy storage or transport.
