Re: Securing of cable retaining screws

Dear Sirs,

In order to avoid eventual complaints regarding cable retaining screws getting loose on headlamp and generator, these screws are since short secured with a safety lacquer on the production line.

In case of future complaints or as preventive measure we suggest you to secure the cable retaining screws with the safety lacquer Metallophyl Grün (green) which you may purchase directly from

Hanseatische Farben- und Lackfabrik

2 Hamburg - Bahrenfeld

Gasstrasse - Western Germany

Very truly yours,

BAYERISCHE MOTOREN WERKE
Aktiengesellschaft
