

**BMW MOTORCYCLE AND RIDER'S EQUIPMENT:
THE CURRENT RANGE.**

BMW MOTORCYCLE AND RIDER'S EQUIPMENT '90.

THOROUGHLY FUTURISTIC. AND WITH HARDLY ANY COMPETITION.

Variety right down the line: BMW's range of equipment offers over 350 possibilities for getting more out of your motorcycle and yourself. Whether you want more comfort, more sport, or more protection, – BMW's range of equipment is exemplary in every respect. In concrete terms this means: perfect quality, a broad selection, most modern design and absolute practicability for each individual product. Here is an up-to-date review.

BMW System Helmet II.

Sensible comfort, well-designed aerodynamics and highly versatile option possibilities make the BMW System Helmet II a perfect integrated helmet. The outer shell of fiberglass reinforced plastic meets the most stringent safety testing standards in the world. The chinpiece is unique in

that it can be lifted up to an angle of 100°. This makes it easy to put on and take off, even with glasses.

The single-hand visor can be locked in six positions. Even when the

stability and minimizes lift at higher speeds. Featuring soft foam padding around the forehead, temples and cheeks, the BMW System Helmet II is safe and pleasant to wear even on

visor is closed, the sophisticated ventilation system ensures a draft-free supply of fresh air inside the helmet and helps prevent the visor from fogging over. Through its aerodynamic design with grid structure and chin spoiler, the helmet reduces wind noise, improves directional

long trips. A number of interesting accessories go along with the BMW System Helmet II – the BMW helmet shield for instance. Just exchange the shield for the visor and the off-road version is ready.

BMW touring sweatshirt.

Motorcycle fashion that looks good on a ride around town too. The BMW Touring Sweatshirt is made of easy-care cotton blend fabric in BMW design. The high crew-neck can be unzipped into an easy V-neck style.

Something attractive for out and about: **BMW GORE-TEX® suit, rain suit C, Enduro suit Dakar, City Overall, PROTEC suit** (from left to right).

BMW GORE-TEX® boots.

Up-to-date driver's equipment now includes matching GORE-TEX® boots: Here too the GORE-TEX® material guarantees total weather protection. It is absolutely wind-proof and watertight but has an active breathing effect at the same time. Other advantages include: Plastic reinforcement pads around the ankles, reflective stripes on the rear of boot, shaft reinforcement on the forefoot, slip-resistant and antivibration soles. The elastic seam and the three-fold velcro fastening enhance comfort.

BMW PROTEC suit.

This sports style protective suit provides a combination of safety and comfort. The basic material is top-quality cow-hide up to 1.2 mm (0.047") thick. Highly tear-resistant kevlar fabric is incorporated around the shoulders, elbows, lower arms and hips. SECUFLEX protector pads are stitched on here and on the knees too. SECUFLEX, a material developed for BMW, has an extremely cushioning effect which will not restrict comfort. A special back support for insertion into the jacket lining is available as an option.

BMW rainsuit C.

Ideal rain protection just to pull on over the top. And comfortable too as it is easy to put on and has velcro fastenings. Reflective stripes enhance safety. Extremely tear-resistant material. Matching rain boots and gloves are also available. And there is even a practical bag for stowing the suit away in.

BMW care products.

The BMW spray was especially developed for the care of the current BMW motorcycle wear. The propellant is free of fluorocarbons.

BMW K1 bathing towel.

BMW sunbathing accessories: the K1 bathing towel. It measures 160 x 75 cm (63" x 29½") and is particularly hard-wearing and easy-care.

BMW motorcycle sound system.

This is ideal for mobile music lovers: The attractively styled two-way loudspeakers have a maximum output of 40 watt each. They fit into the BMW radio installation kit and go with the BMW motorcycle radio (1).

BMW telescopic fork fluid.

High-efficiency fluid with viscosity position SAE 10W. Benefits: more damping effect, excellent protection against wear and tear, corrosion and foam formation. Suitable for all BMW motorcycles.

BMW three-spoke wheels.

The new three-spoke wheels for the K series not only have a clearly enhanced sports design, they also ensure better roadholding at high speeds. Retrofitting is no problem even on motorcycles equipped with ABS (2).

The BMW Paris-Dakar kit.

Do you want to prepare your BMW GS for the toughest of tests? The BMW Paris-Dakar kit provides you with all you need for the great adventure. The Paris-Dakar fuel tank (35 l = 9.25 U.S. gals.) gives you a range of over 500 km

(310 miles). The tubular frame fairing support provides additional protection from damage in case of a fall.

The fairing made from fiberglass-reinforced PU foam and is fitted onto the frame. The fairing windshield and rectangular headlight enhance long-distance performance. The solo seat offers extra driving comfort and stability on bad roads as well as creating space for the additional luggage rack at the same time.

The strong tubular construction can accommodate a whole load of luggage. The engine cover, wider mudguards, strong aluminium plates underneath the vehicle as well as cylinder protection bars all serve to protect the rider and his machine.

All parts can be supplied individually if desired.

BMW sports suspension for GS models.

The sports suspension ensures more dynamic sports driving on all GS models. The BMW GS sports spring strut allows independent adjustment of damper tension and compression as well as spring pre-tension. The strut achieves optimum suspension results in conjunction with BMW telescopic sports springs especially when off-road and when touring with heavy loads (3).

BMW engine spoiler K 100 RT/LT.

This is for the luxury tourer in the K series: The aerodynamics of the engine spoiler are perfectly adapted to the K 100 RT/LT. It is made of fiberglass reinforced plastic (4). (Engine protection bars cannot be used).
