

# GET THE LUFTMEISTER BOOST

## TURBOS—HANDLING—EXHAUSTS—IGNITIONS

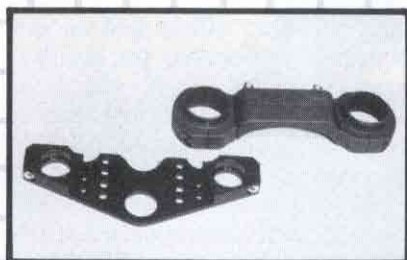

### TURBO

If you want the ultimate in performance for your BMW without the loss of reliability, bolt on a Luftmeister Turbo Kit and increase your horsepower from 40 to 60%.

Enjoy the breath-taking acceleration that only a turbo can give you. Good mileage and streetability are more important to us than brute power. Luftmeister's Turbo Kits really work and are used daily for sport riding and touring. All Turbo Kits are black-chrome finished and are complete with many extra features such as:

- Heavy-Duty Valve Springs
- Turbo Clutch
- Oil Cooler and More

For a free 32 page catalog on our complete line, return this ad copy plus \$1.00 for postage and handling to:

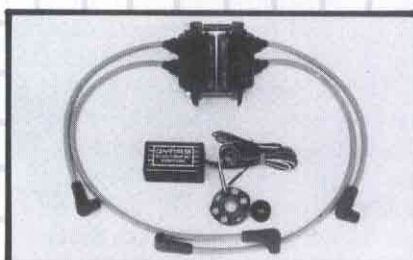

### HANDLING — NEW FOR 1984

If you have been waiting for the ultimate handling components, wait no more. We have two new items that will upgrade the handling of your BMW substantially.

Our "Telefix" Fork Brace is a bolt on, 5 minute installation that will add beauty & functionality. Our new Triple Clamp is machined from a 6061T6 aluminum billet and is black anodized and features two 8mm pinch bolts. Additional components are available such as Swing Arm Braces and Shock Absorbers.

(See our catalog offer for more details.)

### IGNITIONS

Our ignition kits feature Dyna and Accel Boosters as well as complete Dyna kits which includes 8mm Jacobs, Taylor or Accel wire sets.

### 2 INTO 1 SYSTEMS

Our newest handmade 2 into 1 systems are the best because:

- 1) Handmade collector with a 27" baffle that has a 1 1/4" exhaust hole which produces less back pressure and less noise due to the length.
- 2) Completely wrapped with Explosafe (TM) which will last twice as long as conventional fiberglass.

Our systems are available in black chrome (Part #588) or in bright chrome (Part #587) and will fit all BMW's from 1970-on and now there is a new exhaust system for R65 models (Part #589) black chrome or (Part #584) bright chrome.
